SUBJECT INDEX

Actuator for optical head, three-dimensional, 103
Amorphous Te-C films for an optical disk, 190
Amorphous thin film disk for magneto-optical memory, 208
Audio disks (DAD), optical head for digital, 48

Barrier coatings for optical recording media, 228
Binary data transmission through TV channels by equivalent chrominance signal, 110
Bubble-forming optical direct read after write (DRAW) media, characteristics of, 174
Bubble-forming optical recording media, trilayer, 166
Burroughs, performance of optical media from, 186

Characteristics of bubble-forming optical direct read after write (DRAW) media, 174
Characteristics of laser diodes and picture quality, 56
Characterization of optical disks, 247
Chrominance signal, binary data transmission through TV channels by equivalent, 110
Coatings for optical recording media, barrier, 228
Control system, optical disk servo, 81

Data storage system application, optical focus servo for optical disk mass, 89
Data storage systems, Laser Card for compact optical, 61
Data transmission through TV channels by equivalent chrominance signal, binary, 110
Density optical recording cartridge, high, 252
Density read/write optical system, high, 21
Developments in fabrication of optical disks, 236
Digital audio disks (DAD), optical head for, 48
Digital optical disk memory system, multichannel, 8
Digital optical disk systems, performance measurements from, 33
Diodes and picture quality, characteristics of laser, 56
Direct read after write (DRAW) media, characteristics of bubble-forming optical, 174
Disk, amorphous Te-C films for an optical, 190
Disk, image recording with laser and optical, 98
Disk for magneto-optical memory, amorphous thin film, 208
Disk mass data storage system application, optical focus servo for optical, 89
Disk memory system, multichannel digital optical, 8
Disk memory system, optical, 25
Disk, optical video recorder using tellurium sub-oxide thin film, 40
Disk optics, video, 154
Disk players, lenses for optical, 148
Disk servo control system, optical, 81
Disk storage system applications with a common technology base, optical, 2
Disk, sub-oxide thin films for an optical recording, 195
Disk surfaces, evaluation of optical, 242
Disk systems, performance measurements from digital optical, 33
Disk technology, optical systems for optical, 137
Disk technology, tracking techniques in pregrooved, 94
Disks, characterization of optical, 247
Disks (DAD), optical head for digital audio, 48
Disks, developments in fabrication of optical, 236

Error detecting and correcting system for optical memory, 116
Evaluation of optical disk surfaces, 242

Fabrication of optical disks, developments in, 236
Films for magneto-optical recordings, static tests of TbFe, 223
Films for an optical disk, amorphous Te-C, 190
Focus servo for optical disk mass data storage system application, optical, 89

High density optical recording cartridge, 252
High density read/write optical system, 21
Hydrogenated semiconductors as optical recording media, 181

Image recording with laser and optical disk, 98

Laser Card for compact optical data storage systems, 61
Laser development, projections for short wavelength semiconductor, 125
Laser diodes and picture quality, characteristics of, 56
Laser and optical disk, image recording with, 98
Lenses for optical disk players, 148

Magneto-optic storage, signal-to-noise in, 215
Magneto-optical memory, amorphous thin film disk for, 208
Magneto-optical recordings, static tests of TbFe films for, 223
Mass data storage system application, optical focus servo for optical disk, 89
Media, characteristics of bubble-forming optical direct read after write (DRAW), 174
Media, hydrogenated semiconductors as optical recording, 181
Media, textured optical storage, 202
Memory, error detecting and correcting system for optical, 116
Memory system modeling: read/write, optical, 70
Memory system, multichannel digital optical disk, 8
Memory system, optical disk, 25
Modeling: read/write, optical memory system, 70
Multichannel digital optical disk memory system, 8

Noise to magneto-optic storage, signal-to-, 215

Optic storage, signal-to-noise in magneto-, 215
Optical data storage systems, Laser Card for compact, 61
Optical disk, amorphous Te-C films for an, 190
Optical disk, image recording with laser and, 98
Optical disk mass data storage system application, optical focus servo for, 89
Optical disk memory system, 25
Optical disk memory system, multichannel digital, 8
Optical disk players, lenses for, 148
Optical disk servo control system, 81
Optical disk storage system applications with a common technology base, 2
Optical disk surfaces, evaluation of, 242
Optical disk systems, performance measurements from digital, 33
Optical disk technology, tracking techniques in pregrooved, 94
Optical disks, characterization of, 247
Optical disks, developments in fabrication of, 236
Optical focus servo for optical disk mass data storage system application, 89
Optical head for digital audio disks (DAD), 48
Optical head, three-dimensional actuator for, 103
Optical media from Burroughs, performance of, 186
Optical memory, error detecting and correcting system for, 116
Optical memory system modeling: read/write, 70
Optical recording cartridge, high density, 252
Optical recording disk, sub-oxide thin films for an, 195
Optical recording media, barrier coatings for, 228
Optical recording media, hydrogenated semiconductors as, 181
Optical recording media, trilayer bubble-forming, 166
Optical recordings, static tests of TbFe films for magneto-, 223
Optical storage media, textured, 202
Optical system, high density read/write, 21
Optical systems for optical disk technology, 137
Optical video recorder using tellurium sub-oxide thin film disk, 40
Optics, video disk, 154

Performance measurements from digital optical disk systems, 33
Performance of optical media from Burroughs, 186
Picture quality, characteristics of laser diodes and, 56
Pregrooved optical disk technology, tracking techniques in, 94
Projections for short wavelength semiconductor laser development, 125

Read/write, optical memory system modeling: 70

Recording cartridge, high density optical, 252
Recording disk, sub-oxide thin films for an optical, 195
Recording with laser and optical disk, image, 98
Recording media, barrier coatings for optical, 228
Recording media, hydrogenated semiconductors as optical, 181
Recording media, trilayer bubble-forming optical, 166
Recordings, static tests of TbFe films for magneto-optical, 223

Semiconductor laser development, projections for short wavelength, 125
Semiconductors as optical recording media, hydrogenated, 181
Servo control system, optical disk, 81
Servo for optical disk mass data storage system application, optical focus, 89
Short wavelength semiconductor laser development, projections for, 125
Signal-to-noise in magneto-optic storage, 215
Static tests of TbFe films for magneto-optical recordings, 223
Storage media, textured optical, 202
Storage, signal-to-noise in magneto-optic, 215
Storage system applications with a common technology base, optical disk, 2
Storage systems, Laser Card for compact optical data, 61
Sub-oxide thin film disk, optical video recorder using tellurium, 40
Sub-oxide thin films for an optical recording disk, 195
Surfaces, evaluation of optical disk, 242

TbFe films for magneto-optical recordings, static tests of, 223
Te-C films for an optical disk, amorphous, 190
Technology base, optical disk storage system applications with a common, 2
Technology, tracking techniques in pregrooved optical disk, 94
Tellurium sub-oxide thin film disk, optical video recorder using, 40
Textured optical storage media, 202
Thin film disk for magneto-optical memory, amorphous, 208
Thin film disk, optical video recorder using tellurium sub-oxide, 40
Thin films for an optical recording disk, sub-oxide, 195
Three-dimensional actuator for optical head, 103
Tracking techniques in pregrooved optical disk technology, 94
Trilayer bubble-forming optical recording media, 166
TV channels by equivalent chrominance signal, binary data transmission through, 110

Video disk optics, 154
Video recorder using tellurium sub-oxide thin film disk, optical, 40

Write, optical memory system modeling: read/, 70
